

Joel Kram - Fullstack Developer

Joelnskram@gmail.com | 07513 807 647 | Melbourne/London | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Fullstack developer focused on building fast, dependable, user-focused web applications with React, TypeScript, and Node.js, focusing on excellent UI and UX. I bring a background in music technology and 10 years of technical support across creative industries, giving me strong user empathy, clear communication, and a pragmatic approach to problem-solving. I care about performance, robustness, and delivering interfaces that feel trustworthy. First Class Honours graduate.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Node.JS, Golang
Testing: TDD (Test Driven Development), Jest, Supertest, Vitest, Storybook, Playwright, Checkly
Back-end: SQL, PSQL, Typescript, Drizzle, Prisma, Sequelize, Go
Front-end: HTML, CSS, React, Tailwind, Bootstrap, Next.js, Responsive Design, Mobile First Development
Libraries: p5.js, Three.js, WebGL, Tanstack, Redis, Tanstack Router, Zustand, Chi, Gin
Audio Visual: Photoshop, Illustrator, InDesign, VDMX5, TouchDesigner, Ableton, Logic Pro
Other: Paired programming, Technical communication, ITIL Processes, AGILE methodologies, Component architectures, state management, Opencode, Claude Code, Agent Skills

PROJECTS

Threejs-Experiments: <https://github.com/pooch1e/threeJsPortfolio>

Web application featuring React frontend with a custom threeJs class based setup. Also includes custom GLSL shaders for visual experiments. Implemented a Golang backend, with Chi routing, for authentication using JWT http header only session saved as a cookie.

Open-Curator: <https://github.com/pooch1e/open-curator>

Web app combining two public art APIs to let users build virtual exhibitions with Next.js and Typescript, focusing on API integration and fully responsive design.

TinyTheads: <https://github.com/pooch1e/tinythreads>

Mobile progressive web application built in Typescript, using localDB for storage. Implements a machine-learning background removal tool for image manipulation, with CRUD capabilities.

PROFESSIONAL DEVELOPMENT

Junior Software Developer | Northcoders | Apr 2025–Jul 2025

- Built modular Node.js applications using Express and Jest (TDD).
- Applied OOP principles and conducted peer code reviews.
- Contributed to the development of a production system, ensuring code quality and reliability.
- Built and deployed React projects via Netlify.

CompTIA+ | CompTia | Aug 2025

- Core IT certification covering networking, hardware, and OS fundamentals.

EXPERIENCE

Junior Frontend Engineer | Sentric/Believe | Nov 2025–Current

- Built and maintained production-facing React/TypeScript features across multiple apps, improving performance and reliability.
- Contributed to the internal component library, standardising UI behaviour and accelerating feature delivery.
- Owned the Gig Publishing page rewrite, improving API flows, routing performance (TanStack Router), and overall UX.
- Improved UI consistency across applications through shared design patterns and component parity.
- Introduced automated testing across apps with Vitest, Checkly, and Storybook, including a large integration test suite where none previously existed.
- Used Opencode and Claude for AI-assisted pair programming and test generation, speeding up development and improving code quality.
- Streamlined technical support ticketing process with Kanban and Jira for 200+ users, including debugging and resolving complex issues, which resulted in a noticeable drop in the average ticket resolution time by 20% and

increased user satisfaction.

- Modernised legacy JavaScript pages by refactoring 10+ modules to align with modern TS standards, improving application performance by 8% and simplifying future enhancements.

Freelance Developer | Self Employed | Apr 2025–Nov 2025

- Developed and deployed SEO-optimized splash pages using React, Tailwind, and Three.js, increasing page load speeds by 20%.
- Redesigned client portfolios, improving accessibility with ARIA labels and semantic HTML, which reduced bounce rates by 15%.
- Created custom splash page integrating Three.js animation and SoundCloud links for a DJ website

Junior Data Protection Clerk | Unison | Sep 2025 - Nov 2025

- Support administrators with Subject Access Requests (SAR) and Data Protection Training enquiries
- Administering SAR bundles and sending to Data Subjects
- Upholding key data protection policies across Unison trade union

CaseWeb Administrator | Unison | Jan 2024–Apr 2025

- Orchestrated first-line technical support for 400+ distributed users, achieving the highest ticket closure rate among peers and earning commendation for responsiveness.
- Translated user feedback into actionable development insights, bridging technical and non-technical stakeholders to improve platform usability

FOH | Pophams Bakery | Jun 2023-Dec 2023

- Championed daily store opening and closing procedures, maintaining a pristine environment, processing over 100 daily transactions, and resolving customer inquiries quickly, leading to consistent operational efficiency.

FOH | The Dusty Knuckle | Jan 2023-Jun 2023

- Cultivated a welcoming atmosphere as front-of-house staff, exceeding customer expectations by tailoring wine and cocktail recommendations to individual preferences, resulting in 95% positive customer feedback.

Costume Secretary | Mammoth Screen | Jun 2022-Jan 2023

- Spearheaded interdepartmental communications, reducing production workflow bottlenecks by 15%, and ensuring all costume-related needs were met on time for a team of 20+ individuals.
- Orchestrated smooth employee departures by archiving essential documents and recovering company assets, maintaining 100% compliance with data security protocols and preventing data loss incidents for 7 months.
- Supervised costume inventory database, tracking over 300 costume items, and automated weekly compliance reports, enabling the costume department to reduce discrepancies during stock takes by 15%.

Gallery Assistant | Museum of Australian Photography | Jan 2022-Jun 2022

- Led the invigilation of 20+ public exhibitions, ensuring the protection of valuable artwork and providing a safe, engaging experience for over 5,000 visitors during the six-month tenure.
- Designed and implemented a new rostering process for 30+ volunteers, ensuring optimal coverage for all gallery activities and a 95% fulfilment rate of scheduled shifts with minimal last-minute substitutions.
- Administered the Salesforce database, maintaining records for 500+ donors and program participants, enabling targeted fundraising campaigns that generated a 15% increase in donations within the first quarter.

Production Assistant | EndemolShine | Sep 2021-Jan 2022

- Facilitated on-set efficiency for 'Hunted' (S1) by delivering crucial production support across departments, resolving unforeseen logistical problems and maintaining consistent communication channels among the team.
- Coordinated transport for cast and crew, ensuring timely arrivals and minimising filming delays.
- Drove a 15% reduction in wasted catering spend by implementing a detailed daily headcount system, aligning food orders with actual crew attendance, while ensuring staff welfare through tailored dietary options.

EDUCATION

Certificate IV Music Technology | Braemar College | Feb 2013-Nov 2014

Recorded, mixed and produced an extended play of live music using Ableton Live and Logic Pro

Bachelor of Fine Art: Photography | Royal Melbourne Institute of Technology | Feb 2016-Nov 2019

Graduated with First Class Honours and made Vice Chancellor's list
